

US 301/SR 43 Intersection Improvements at Symmes Road 445392-1-52-01

Project Details	
Work Type	Rigid Pavement Reconstruction, Traffic Signals, and Signing/Pavement Markings. Associated drainage, ADA, and safety improvements.
Phase	Design
Limits	Intersection of US 301/Symmes Rd, extending along US 301 from one quarter-mile south of Symmes Rd to one quarter-mile north of Symmes Rd
Length	.530 Miles
City	Riverview
County	Hillsborough
Road	US 301
Design Cost	\$482,000

About

The purpose of this project is to reconstruct the intersection of US301 at Symmes Rd. in Hillsborough County. The intersections will be constructed with rigid pavement to provide a sustainable surface with a longer service life. The work also includes minor drainage improvements, bringing ADA features into conformance with current standards, and perform general safety modification work.

A traffic signal will also be added at the intersection of US 301 and Shady Preserve Drive as part of this project.

This project is currently in the design phase. Construction is anticipated to begin in 2025.
